Chickenpox - Varicella

We have had reports of students having contact with other children with Chicken Pox outside of school so please be aware of

Signs and symptoms
- A mild fever.
- Feeling tired and irritable.
- Itching.
- Rash.

The rash usually first appears on the chest, back or face. It then can move to other areas of the body including inside the mouth. At first, the rash looks like small pimples. These later become blisters full of fluid.

How contagious is chickenpox?

Chickenpox is highly contagious. If you have chickenpox you will be contagious (able to spread the virus) from up to 2 days before the red spots appear and until around 5 days after all scabs or crusts are dry.

You will stop being contagious when there are no new blisters or moist crusts forming on your body.

Australia’s Biggest Morning Tea
Friday 20th May - St Joseph Centre

Any donations for the raffle would be greatly appreciated.
